DINING TABLE **AKI**

The Aki table combines Scandinavian design with functional features for use in health & care facilities, restaurants, and cafeterias. Its oak-stained wood look creates a warm, cozy atmosphere. The easy-care MDF tabletop is covered with beech veneer and blends harmoniously into the sturdy, tapered beech legs. The striking Swiss edge and the slightly flared legs underline the characteristic, lightweight design language. The individually attached legs offer plenty of legroom and make daily use easier. At the same time, Aki can be perfectly lined up with other tables, making it particularly suitable for flexibly used spaces and larger table groups. With a height of 75.5 cm and generous legroom, Aki is wheelchair-accessible along its long side. The table is available in the size 160 × 80 cm.

- Wheelchair-accessible: The long side offers generous legroom for comfortable wheelchair use
- Easy-care & robust: The veneered MDF tabletop and sturdy beech legs are ideal for daily use
- Flexibly combinable: Aki can be lined up to save space and is perfectly suited for larger table groups
