TABLETOP LESIL

Thanks to its light, slim look, Lesil makes a great addition to modern furnishing concepts. This is largely owed to the angled edges and rounded corners, which are typical of this tabletop. The low-maintenance HPL (High Pressure Laminate) surface fulfils the requirements of DIN EN 438 for kitchen countertops thanks to its durability. The impact-resistant tabletop is available in six different finishes and can be used together with Scandi designs as well as industrial style.
